Project

Power Plant Commercial Flooring

System

VersaFlex / Raven Primer / ClearSeal

Applicator

Blackwater Environmental

Date

December 2018

Blackwater Environmental applied 8500 square feet of Clearseal with Raven/VF primer for turbines areas and walk-ways in a private power plant. As a safety precaution, safety yellow pigment was necessary for the walkways, plus texture for slip resistance. Clearseal is a great product for the high heat environment and quick turnaround from shutdown work for the facility.
